Emilio Funes

BACKEND DEVELOPER

ABOUT ME

Backend developer with experience in Java and Spring Boot, focused on building robust and scalable solutions. I specialize in creating RESTful APIs, integrating with relational databases like MySQL, and managing business logic. I am currently studying for a University Technician degree in Programming at UTN. I have worked on e-commerce and product management projects, implementing secure authentication and authorization, as well as integrating payment gateways.

EXPERIENCE

HOSPITAL MANAGEMENT SYSTEM – UTN

National Technological University – MDP Region Present

Technologies Used: Java, MySQL, Git, GitHub. Development of a hospital data management system with complete CRUD functionalities.
Roles and Responsibilities: Designed the database and relationships. Implemented CRUD operations for patients, doctors, and reservations, etc. Used stored procedures and triggers for automation and data integrity maintenance. Utilized version control with Git and GitHub. As a result, we improved efficiency and accuracy in hospital data management, optimizing response times and medical care.
